

Call for Proposals to Host IEEE TALE 2022

IEEE TALE (<http://tale-conference.org/>) is the IEEE Education Society's flagship Asia-Pacific conference series, catering to researchers and practitioners with an interest in **science, technology, engineering and mathematics (STEM) education** as well as those interested in the **innovative use of digital technologies for learning, teaching and assessment in any discipline**. The conference target audience is diverse and includes those working in the higher education, vocational education and training (VET), K-12, corporate, government and healthcare sectors.

The TALE Steering Committee is currently seeking proposals from institutions to organise and host the TALE 2022 conference. In the first instance, prospective organisers/hosts should contact the Steering Committee Chair, Mark J. W. Lee, at info@tale-conference.org to express an interest and to obtain a copy of the pro forma for proposals.

The deadline for the receipt of proposals to host TALE 2022 is **31 October 2020**, and applicants will be notified of the outcome no later than 31 January 2021. Please note, however, that the Steering Committee reserves the right to make a decision ahead of the proposal submission deadline on the basis of proposals received prior to that date.

Preference will be given to geographical areas and countries that have yet to host a TALE conference (see http://tale-conference.org/TALE_past-conferences.php for a list of past years' locations), but **only proposals from the Asia-Pacific region (IEEE Region 10) will be considered**. Those who are based in other parts of the world may be interested in the IEEE Education Society's other conference series, including Frontiers in Education (North America, IEEE Regions 1–7), EDUCON (Europe, Middle East and Africa, IEEE Region 8) and EDUNINE (Latin America, IEEE Region 9).
